INFORMATION FOR ECONOMIC CONTRACTORS No. 1

It concerns the public procurement procedure conducted in the Offer Inquiry mode, the subject of which is *The delivery of the five identical accelerometers with the necessary auxiliary devices. The order is carried out under the project „EPOS – European Plate Observing System (EPOS-PL+)”, TASK 5, Grant agreement No. POIR.04.02.00-00-C005/19-00.*

The Contracting Authority answers Economic Contractor's question:

Question: I see from the documents that it is still required for SFTP, SSH, FTP (which is now obsolete) and HTTPS.

As the Fortimus is controlled through a GUI interface it is assumed that security is set up on the network side of things rather than from the digitiser.

We do have digitisers that support SSH, HTTPS etc so may have to change our offering but, out of curiosity.. may I please ask why this criteria is needed?

Are you sending data directly to EPOS and is this a criteria of their system?

Or is it because this is how your current system and array is set up?

Answer: the Contracting Authority upholds the requirements indicated in line 20 of the Technical Parameters of the subject of the contract and will not resign from the requirement of any protocol mentioned in the above-mentioned parameters.
